Features

Graber® CrystalPleat™ Cellular Shades are made from a variety of luxurious spunlace, point-bond or woven fabrics. These shades are highly energy efficient due to the pockets of air formed by the cellular design. The CrystalPleat collection is the perfect combination of function and fashion, providing energy efficiency while stylishly covering your windows.

- Highly energy efficient (see Energy Performance)
- Solutions for numerous privacy and light-control needs
- Offered in three cell sizes to match diverse decor styles
- Broad spectrum of on-trend colors to enhance every room
- All shade components are color coordinated

LIGHT CONTROL AND PRIVACY

Sheer: Allows light to enter the room where light control and privacy are not a concern. Objects in the room can be seen quite clearly through shades.

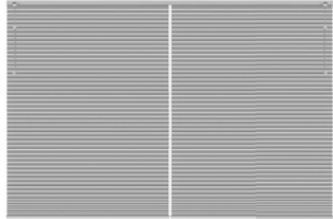

Light Filtering*: Gently diffuses incoming light to provide some light control and moderate privacy.

Room Darkening*: Significantly dims light entering the room. Deeper fabric colors offer more light control and moderate privacy.

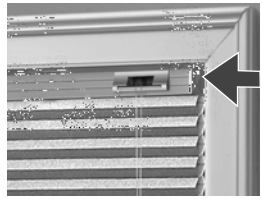

Blackout: Blocks all light from entering the room. All fabric colors provide maximum light control and complete privacy.

*These fabrics are translucent and their colors may be influenced by changing light conditions. Colors may appear to vary depending upon the time of day and type of lighting, as well as whether the shade is partially or fully lowered.

CONTINUOUS-LOOP LIFT SYSTEM OPTION

- **For surcharges, see Price Charts**
- Recommended for larger, heavier shades
- The clutch mechanism in the color coordinated aluminum headrail assists in raising and lowering the shade; it stops the shade at any point and holds the bottomrail level
- A single, white continuous-loop cord raises and lowers the shade and keeps the cord the same length
- Continuous-loop Lift stacks the fully raised shade more compactly than a standard cord and holds it more securely
- Safety locking cord guide included; cord guide must be installed for shade operation
- Available as multiple shades on one headrail (standard gap ½")
- Available on Top Down Only specialty shades
- Side mounts available up to 60" wide by 96" high

MOTORIZATION

- **For additional Motorization options and pricing see Motorization tab**
- Window treatments can be operated from virtually anywhere in the home
- Provides easy operation of hard-to-reach or large windows
- Efficiently manages energy (heat gain and loss)
- Operate multiple window treatments simultaneously or individually
- Cordless motorization eliminates the strangulation hazard of products with accessible operating cords
- Easily integrated with home-automation systems
- Low voltage motorization requires no costly electrical hard-wiring
- Motor located on right side within the head rail
- Powered with Battery Wand or Transformer
- RF (Radio Frequency) only
- Multiple Shades on One Headrail available; each panel will have a motor
- Not available with Bottom Up/Top Down, Top Down Only, Sky Track or Specialty Shapes
- Not available with hold-down brackets

Multiple control options available

- Remote: Convenient, portable control (single or five channel available)
- Wall switch: Control shades/blinds when entering or exiting a room with the simple push of a button
- Timer: Allows you to program operation at certain times of the day
 - To manage heat loss and gain automatically — a great way to reduce your energy bill in any season
 - To protect furniture from UV rays
 - To improve security by making your home look occupied when you're away

NOTE: Motorization components and accessories have a five-year limited warranty; excludes battery wands and batteries

CORNER WINDOWS

- **No charge**
- Made as individual shades
- Each shade will have its own control, we recommend opposite corners
- Indicate for each shade whether left or right and butt or bypass
- Bypass shade is mounted into the corner; butt shade is abutted to the other shade
- Manufacturer will take appropriate deductions for proper fit. **DO NOT** order as a Corner shade if you do not want manufacturer to take deductions.
- **Cornices or Decorative Wood Valances are not available on corner windows**
- For Bottom Up/Top Down and Sun Up/Sun Down corded shades the corner controls will be hard to reach
- For Slide-View™ Cellular shades, the handles between the Bypass and Butt shades will be offset 3¾" from each other for ease of operation

Measuring Information

Mounting on a Wall or Molding

Measure the width of each window from the corner on the mounting surface (molding or wall) to the point you would like to cover.

Mounting Above the Molding:

Measure the width of each window from the corner on the mounting surface to the point you would like to cover.

Projection measurement is the distance needed to clear any molding or obstructions that the shade will be mounted above.

Note: The Projection (P) distance is needed to correctly calculate deductions for installations where the shades will use shims or projection brackets to clear molding. All projection distances must match for correct deductions to be calculated.

BAY WINDOWS

- **No charge**
- Made as individual shades.
- Each section will have its own control
- Manufacturer will take appropriate deductions for proper fit. **DO NOT** order as a bay window shade if you do not want manufacturer to take deductions.
- **Cornices or Decorative Wood Valances are not available on bay windows**
- For Bottom Up/Top Down and Sun Up/Sun Down corded shades, depending on the angle, controls may be hard to reach.
- For Slide-View™ Cellular shades there is a light gap between adjacent side rails.

Measuring Information: Three-sided Bay Window

Measure:

- L and R:** Width of each side window from the corners on the mounting surface to the point you would like to cover.
- C1:** Width of the center window on the mounting surface from corner to corner.

- Angle L-C1:** Angle between the (L) and (C1) windows.
- Angle C1-R:** Angle between the (C1) and (R) windows.

Projection: If needed: The depth of the trim or molding the shade will be mounted above.

Measuring Information: Four-sided Bay Window

- L and R:** Width of each side window from the corners on the mounting surface to the point you would like to cover.
- C1, C2:** Width of each center window on the mounting surface from corner to corner.

- Angle L-C1:** Angle between the (L) and (C1) windows.
- Angle C1-C2:** Angle between the (C1) and (C2) windows.
- Angle C2-R:** Angle between the (C1) and (C2) windows.

Projection: If needed: The depth of the trim or molding the shade will be mounted above.

Note: The Projection (P) distance is needed to correctly calculate deductions for installations where the shades will use shims or projection brackets to clear trim or molding. All projection distances must match for correct deductions to be calculated.

For additional windows on bays with up to five sides continue with number progression for center shade sizes (C1, C2, C3, ...) and angles (Angle C1-C2, Angle C2-C3, ...) as needed.

Measure each bay angles using a protractor or angle finder or use two business cards in each bay corner as illustrated above and fax to customer service.

The Angle to use between adjacent center bay windows along a straight section of wall is 180 degrees.

SPECIALTY SHAPES: ARCH SHADES

Perfect Arch: Half Circle

Triangle

(template required)

Palladian

(template required)
Illustration not to scale.

Quarter Circle

(template not required if perfect quarter)

Eyebrow Arch

(template required)

Elongated Arch (arch with straight sides)
(template required)

Full Circle

(template not required if perfect circle)

- For surcharge, see **Options Pricing**
- Include width and height measurements on all orders
- For inside mount, measure inside of window frame; for outside mount, add the desired amount of overlap to your measurements
- All arches are stationary
- Outside mount brackets will be visible
- Side mounts available up to 60" wide exact

PERFECT ARCHES are those in which the radius of the circle is constant at all points (height is exactly one-half the width).

PERFECT QUARTER CIRCLE AND FULL CIRCLE are those in which the width and the height are the same.

NON-PERFECT ARCHES are not constant at all points. Deviation of even $\frac{1}{16}$ " makes it imperfect. Non-perfect Quarter Circles and Circles are those where the width and height are different.

- All non-perfect arches require a template

SIZE CONSIDERATIONS

Specialty	Minimum Width*	Maximum Width	Minimum Height	Maximum Height
Half Circle	9"	84"	4½"	42"
Palladian, Elongated, Eyebrow and Triangle	9"	84"	20% of width; minimum 4½"	60% of width
Quarter Circle	9"	47"	9"	1.5 times width
Full Circle	9"	36" overall width	9"	36"

* For all inside mount applications— $\frac{3}{8}$ " deduction is taken on overall width

SPECIALTY SHAPES: ARCH OVER STANDARD SHADE

A – Arch Height

H – Standard Shade Height

- For pricing of arches, see **Arch Pricing in pricing section**
- If you want a single shade to cover the arch and standard portion of the window (without a separation between), order the shade as an "Arch Over Standard"
- Arch Over Standard shades are made as one shade with no light gap between the arch and standard shade portions of the window
- The arch portion is fixed while the standard portion operates normally
- When ordering, provide the three measurements W, H and A (shown to the left) along with a template of the arch portion if it is non-perfect
- Inside mount must be side mounted
- **Arch and standard portion must have same width**
- Template required for all Non Perfect Arch over standard shades
- Arch Over Standard shades are only available as a Standard corded shade or as a Bottom Up/Top Down corded shade

	Minimum Shade & Arch Width*	Maximum Shade & Arch Width†	Minimum Std Shade Height	Maximum Height	Minimum Arch Height
Arch	12"	60"	9"	96"	20% of width; minimum 4½"
Quarter Circle	12"	47"	9"	96"	20% of width; minimum 9"

* For all inside mount applications— $\frac{3}{8}$ " deduction is taken on overall width

Options

SPECIALTY SHAPES: OCTAGON AND HEXAGON

- For surcharge, see Options Pricing
- Provide width and height at center of shade
- Octagon and Hexagon require template
- Octagon and Hexagon are stationary (no controls)

	Minimum Total Width & Height	Maximum Total Width & Height
All Fabric Styles	9"	36"

SPECIALTY SHAPES: TRAPEZOIDS

- For surcharge, see Options Pricing
- Only available with Standard Cord Control option
- Trapezoids only open in direction of the longest rail; longest rail will be fixed
- Trapezoids with one straight side are not available
- Must provide measurements of all four sides; diagram with all dimensions noted is required
- Side mounts not available

	Minimum Width & Height	Maximum Width of Long Rail	Max. Difference Between Long & Short Rails on Each Side	Maximum Height
All Fabric Styles	12"	74"	9"	96"

SPECIALTY SHAPES: ANGLE TOP/ANGLE BOTTOM

- For surcharge, see Options Pricing
- Only available with Standard Cord Control option
- Specify angle top or angle bottom when ordering
- Angle top control must always be on the low side
- Angle bottom control can be in either the left or right; must specify
- Angle top not available with side mount
- Angle bottom is available with side mount up to 60" wide
- Only operates to the intermediate rail; will not completely lift to full angle. Depending on degree of an angle, shade may be difficult to operate.

Size Considerations	All Fabric Styles except Cocoon Double Cell	Cocoon Double Cell
Minimum Angled Width	12"	12"
Maximum Top Angle Width	90"*	84"
Minimum Short Side of Angle	0"	0"
Maximum Bottom Angle Width	41"	30"
Minimum Long Side Height	9"	9"
Maximum Long Side Height	96"	91"
Maximum Angle Top Degree	3/8" Single and Double Cell: 60° 3/4" Single Cell: 45°	60°
Maximum Angle Bottom Degree	45°	45°

* Cocoon Single Cell is 84". Facets, Nuance and Zest are 88".

NOTE: Angle top low side height of 4" or less will be stationary. As the low side measurement approaches 0" a light gap of up to 2" will exist to allow for the rails and fabrics to fit. Angle bottom not available on 3/4" Single Cell fabrics.

Options

MAKING A TEMPLATE FOR SPECIALTY WINDOWS

1. Tape butcher paper or heavy brown wrapping paper over the window opening allowing plenty of overlap.
2. Being careful not to press against the template paper while tracing, draw an exact outline of the window opening. Pressing on the template paper may distort the paper and cause the wrong size to be made.
3. Remove the paper from the window opening. If the shade is an outside mount, add the desired amount of overlap to the window outline. Draw a second outline around it to match the shape of the finished shade. **Be sure to erase the inside line.**
4. Mark the dimensions on the template. Check that the template dimensions match your measurements of the actual window opening.

NOTE: Make sure the template is of the window opening, not the measurement of the glass only.

5. Cut the shape from the paper.
6. **PLACE THE TEMPLATE BACK INTO THE WINDOW OPENING TO CHECK FOR PROPER FIT.**
7. **Indicate on the template:**
 - "Room side" and "top"
 - Purchase order number
 - Customer's name
 - Your store name and account number
8. Attach a copy of your purchase order to the template.
9. Roll up template and place in a mailing tube.
DO NOT FOLD TEMPLATE.

NOTE: This is just a sample for illustration purposes only—other information may be needed for your order.

ACCEPTABLE MATERIALS FOR MAKING TEMPLATES:

Kraft Paper
Butcher Paper
Construction Paper

WE WILL NOT ACCEPT TEMPLATES MADE FROM THE FOLLOWING MATERIALS:

Newspaper	Plastic
Wax Paper	Fabric
Tissue Paper	Roofing Paper
Existing Arch Shades	Wrapping Paper
Poster Board	Cardboard

NOTE: If the material used to make a template stretches, tears easily, will not lay flat, or will mark the fabric, IT WILL NOT BE USED.

USING A TEMPLATE SERVICE

For surcharge, see Options Pricing

To use the template service, simply:

1. Select Template Service when entering your order online.
2. Use the template worksheet to determine what measurements you need to supply for each shape.
3. Enter the lettered measurements using line item comments. The comments have been pre-programmed to all of the measurements you need to enter for your special shape.

ENERGY PERFORMANCE

Graber® Cellular Shades are the smart choice for every window in your home. For year-round comfort, Cellular Shades effectively insulate your windows from the heat and cold. Regardless of climate, they are our most versatile and energy efficient window treatment available.

Cocoon fabric is constructed with three layers made up of a Mylar® liner sealed between two layers of soft, high quality 100% spunlace fabric. This unique design forms a soft, thick barrier of insulation. Independent tests prove Cocoon ¾" Double Cell fabric is one of our most energy efficient fabrics on the market.*

*Values listed are for Cocoon ¾" Double Cell. Based on third party testing, Architectural Testing Incorporated (ATI)

R-Value

R-Value indicates the effectiveness of the window covering at preventing energy from flowing to the outside. The higher the R-Value, the greater the insulating effectiveness.

Solar Heat Gain Coefficient (SHGC)

SHGC measures how well window covering blocks heat from the sun from flowing to the interior. SHGC is expressed as a number between 0 and 1. The lower the SHGC, the better a product is at blocking unwanted heat gain.

General Information

UV PROTECTION

Graber® Cellular shades effectively block ultraviolet (UV) rays. Over exposure to the sun's UV rays can damage furnishings, wood floors, draperies, carpeting and artwork. The Ultraviolet Protection Factor (UPF) rating system measures the UV protection provided by the fabric.

Fabric	UPF Rating	% of UV Blockage
3/8" Double Cell: Cocoon, DayDream, Elegant Neutrals, Facets, Garden Retreat, Nuance, Translucence, Watercolor Linen, Zest	50	99%
3/8" Single Cell: Cocoon, Crinkle, DayDream, Elegant Neutrals, Garden Retreat, Scroll, Solitude, Translucence		
3/4" Single Cell: DayDream, Elegant Neutrals, Garden Retreat, Scroll, Solitude		
3/8" Single Cell: Cambridge, Simply Sheer	<15	71%

UPF Rating

The UPF Rating system measures the UV protection, both UVA and UVB provided by fabric. It is very similar to the SPF rating system used for sunscreens. UPF ratings range from 15 (good) to 50+ (excellent). Shade with a UPF of 50 blocks 99% of the UV radiation.

UV Blockage

UV Blockage is directly related to UPF and shows window covering's effectiveness at preventing ultraviolet rays from entering an interior. The percentage rating indicates the amount of UV rays blocked by the shade.

SOUND ABSORPTION

Graber Cellular shades absorb sound to make rooms comfortable and cozy. The noise reduction coefficient (NRC) represents the amount of sound energy absorbed by the shade. An NRC of 0 indicates perfect reflection; an NRC of 1 indicates perfect absorption.

Fabric	Sound Absorption (Higher is Better)
Elegant Neutrals, Facets, Garden Retreat, Nuance, Zest 3/8" Double Cell	0.60
